

ENHANCEMENTS

PERFORMANCE FORMS™ FOR GELS

WHAT THEY ARE

High-performance sculpting forms for gel enhancements.

WHAT THEY DO

Allow UV light to penetrate through the form, ensuring thorough cure.

WHY YOU NEED THEM

For natural-looking gel enhancements with a deep “C” curve and no seepage.

FEATURED INGREDIENTS & BENEFITS**Special Clear Plastic:**

Holds a “C” curve during sculpting; stands up under heavy pressure. Allows UV light to penetrate for complete cure.

Unique Design:

Can be customized to fit all nail shapes.

Front and Rear Tabs:

Lock form securely in place.

DIRECTIONS FOR USE

- Pre-fold vertical perforations to help shape form and tear off one outer tab.
- Place form under free edge of nail and angle it to create the desired arch.
- Secure form along the side and top of finger, and pinch rear “V” notch together if necessary.
- Create a cylinder with front of form and secure remaining outer tab opposite non-sticky side, locking in a “C” curve.
