

## ESSENTIALS

## CALLUS SMOOTHER

**WHAT IT IS**

An implement for smoothing and reducing tough calluses.

**WHAT IT DOES**

Dual-surface nickel abrasive sloughs and smooths tough build-up of callused skin.

**WHY YOU NEED IT**

- Easy to clean and disinfect.
- Ergonomic shape for ease of use.
- No replacement pieces necessary.
- Ideal shape for versatile use.

**FEATURES & BENEFITS****Acrylic Handle:**

Easy to clean and disinfect.

**Nickel Abrasive:**

Durable, non-corrosive long-lasting surface. Coarse side (larger pattern) equivalent to 60 abrasive grit. Medium side (smaller pattern) equivalent to 100 abrasive grit.

**DIRECTIONS FOR USE**

- Gently rub callused areas of the foot with the coarse (larger pattern) surface, followed by the medium (smaller pattern) surface to smooth skin.
- Clean and disinfect after each use.

**Important:**

- Clean with soap and water and scrub abrasive surface with a brush.
- Disinfect in accordance with State board or other government regulations.
- Immediately pat abrasive surface dry with a clean towel.
- Store in a clean, dry location.
- Due to State board regulations, cannot be sold or used in California.

**Warning:**

Use only as directed. Use only on healthy, intact skin. Do not use on individuals who are allergic to nickel.

CND offers comprehensive education opportunities. Check the education section of [cnd.com](http://cnd.com) for a course near you.

**CREATIVE SUGGESTIONS**

Prep callus with SpaPedicure™ Sea Serum™ for maximum results.
